

ĐỖ MỸ UYÊN

Data Analyst / Business Analyst Intern

Ho Chi Minh City | 0981541661 | uyen150203@gmail.com | LinkedIn: [Mỹ Uyên Đỗ](#)

PROFILE

Digital Business student at RMIT Vietnam with hands-on academic experience in data cleaning, descriptive analytics, regression analysis, data visualization and data-driven recommendations. Comfortable using RStudio and Excel to analyze datasets, identify trends and turn business questions into clear insights. Currently strengthening Data Analyst skills through self-learning and practical projects, with a strong interest in gaming, digital products and user behavior. Seeking a Data Analyst internship where I can support reporting, performance analysis and data-driven product decisions.

EDUCATION

RMIT University Vietnam | Bachelor of Digital Business, 2022 - 2026 (Expected)

- Completed a 6-month student exchange at RMIT Australia in 2023, strengthening communication and adaptability in an international environment.
- Relevant coursework: Business Statistics, Introduction to Business Analytics, Digital Business Design and Innovation, Digital Business Transformation.

ACADEMIC PROJECT EXPERIENCE

Ogilvy Global Marketing Campaign Performance Analytics | RStudio, data cleaning, descriptive analytics, visualization

- **Situation:** Ogilvy had global campaign data across cities, channels, customer groups and languages.
- **Task:** Clarify where marketing value was created and which areas needed optimization.
- **Action:** Cleaned/standardized 3,036 rows and 14 variables in RStudio; compared ROI, conversion rate, acquisition cost, clicks, impressions and engagement by segment.
- **Results:** Delivered benchmark insights for efficient markets/channels and recommended dashboard-backed monitoring and attribution experiments.

Predicting Customer Ratings for Beauty Products | RStudio, regression, predictive analytics, data preprocessing

- **Situation:** Beauty brands needed evidence on which product attributes may influence customer ratings.
- **Task:** Build a simple predictive analytics workflow for rating-driver exploration.
- **Action:** Handled missing values and outliers, converted product-size text into numeric format, created visual comparisons and tested regression models.
- **Results:** Identified Skin Type and Category as more meaningful positioning signals than review volume, while learning the limits of weak predictive models.

IntelliAuto Employee Turnover Reduction Strategy | Logistic regression, Excel Solver, prescriptive analytics

- **Situation:** IntelliAuto faced early-turnover risk during an Industry 4.0 transition.
- **Task:** Prioritize retention actions under limited training hours and compensation budget.
- **Action:** Used logistic regression in RStudio to estimate departure probability for 750 employees, then applied Excel Solver to allocate seminars and pay incentives.
- **Results:** Recommended a feasible 10% reduction plan and showed that a 40% target required additional resources and broader HR interventions.

StockX ARFU Virtual Try-On Feature Proposal | BPMN, use cases, CATWOE, cost-benefit analysis, product design

- **Situation:** StockX users could not visualize how products fit before purchase, increasing dissatisfaction under a strict return policy.
- **Task:** Design a digital feature that improves purchase confidence and customer experience.
- **Action:** Analyzed AS-IS/TO-BE journeys, created BPMN and use-case logic, assessed stakeholders with CATWOE and built cost-benefit reasoning for an AR virtual try-on feature.
- **Results:** Translated user pain points into AS-IS/TO-BE journeys, use cases and cost-benefit logic, strengthening ability to define product requirements from both user and business perspectives.

IQuest / Phu Xuan AI-Driven Enrollment Marketing Initiative | AWS Data Lake, ETL, K-Means, dashboard thinking, business case

- **Situation:** IQuest's ERP, CRM, academic and social media data were scattered, limiting data-driven enrollment decisions.
- **Task:** Propose a scalable data and AI initiative to support targeted recruitment.
- **Action:** Designed a two-phase plan using Amazon S3 Data Lake, AWS Glue ETL, SageMaker K-Means segmentation and dashboard metrics; evaluated costs, risks, OKRs and timeline.
- **Results:** Built a 6-month business case targeting 15% Chinese Language enrollment growth and learned how data architecture supports marketing decisions.

Thailand Digital Payment & FinTech Market Analysis | FinTech research, digital wallets, market trend analysis, risk assessment

- **Situation:** Financial institutions were adapting to rapid digital-payment adoption and changing customer behavior.
- **Task:** Analyze how FinTech applications affect financial services and customer experience.
- **Action:** Researched Thailand's online banking growth, e-wallet usage, payment behavior, cost benefits and security risks.
- **Results:** Learned how FinTech can lower transaction costs, improve UX and create data opportunities while requiring strong privacy and cybersecurity controls.

ADDITIONAL ANALYTICAL EXPERIENCE

Personal Stock Investment Research | 2024 - Present

- Conduct personal stock research by tracking market news, company performance, valuation signals and trading decisions; maintain structured notes to improve risk awareness and evidence-based investment thinking.

SKILLS

Data Analytics: Data cleaning, descriptive analytics, predictive analytics, prescriptive analytics, regression analysis, data visualization, insight storytelling, dashboard/report thinking.

Business Analysis: Requirement analysis, BPMN, use cases, AS-IS/TO-BE process mapping, fishbone, SWOT, cost-benefit analysis.

Tools: Excel, Microsoft Word, Canva, ChatGPT, RStudio, WordPress, Lucidchart.

Soft Skills: Presentation, communication, teamwork, attention to detail, responsibility, fast learning.

LANGUAGES

English: IELTS 6.5 | Chinese: HSK 2 | Vietnamese: Native
